**Introduction:** (Describe the company and the industry they serve.)

L-3 is a conglomerate of industrial and military electronics companies dealing mainly with communications equipment. This division handles military telemetry applications.

**Scope of Project:** (Describe the application.)

Classified. Sixnet provides VT-MODEM components which customer integrates into rack-mounted drawers with other telemetry equipment of their design.

**Solution:** (Describe the SIXNET solution.)

Customer was mandated to use COTS equipment but required mil-spec RJ45 connectors to meet vibration specs. Sixnet provided VT-MODEM-1 components. Customer installed mil-spec RJ45 connectors.

**Products Used:** (List the major SIXNET and HMI components used in the system.)

Qty	Part Number	Description	Qty	Part Number	Description
	VT-MODEM -1				

**Resulting Benefits:** (Describe the problems solved, added benefits, increased efficiencies, etc...)

Partnership with Sixnet enabled customer to realize cost-performance benefits of COTS equipment while customizing same to his requirements.
