Introduction:

Water system for scenic Lewisburg, WV

Scope of Project:

Provide controls for water system tanks and pumps.

Solution:

We used Mini-IPms at 4 tanks and 2 pump stations, as well as in the plant for monitoring and control over leased lines.

Products Used:

Qty	Part Number	Description
6	VT-MIPM-###	Mini-Ipm RTU/Controller
2	ET-GT-###	Ethernet Switches
1	ET-GT-232-1	RS-232 Converter
1	ET-GT-485-1	RS-485 Converter

Resulting Benefits:

We used a single controller module at plant and remote sites for single spare part inventory. All locations have redundant data-logging now.
